Session Title: Recent Advancements of Artificial Intelligence in Computer Science Applications

Session Chair: Mr. Sparsh Sharma,
Assistant Professor, Computer Science & Engineering,
Baba Ghulam Shah Badshah University, Rajouri,
Jammu & Kashmir, India

Abstract: Artificial Intelligence, in particular Deep Learning, has drawn considerable attention of researchers in recent years due to its revolutionary benefits and applicability in computer related areas such as Computer Vision, Driverless Cars, Internet of Things (IoT), Natural Language Processing (NLP), Cyber Security, etc. Machine Learning methods are able to model large volume of data efficiently by finding the patterns and underlying structures and represents the data by its efficient data driven approach to the problems that are encountered in various scientific fields. Since, Artificial intelligence, machine learning and deep learning has its applicability in various fields, and there are some areas where its applicability need to be explored. This Special Issue aims to solicit original research articles, as well as review articles, focusing on the use of Machine Learning and Deep Learning in different novel research areas.

Topics of Interest: Original and unpublished papers are invited in the following topics and not limited to:

- Machine Learning/Deep Learning in IoT
- Machine Learning/Deep Learning in Driverless Cars & VANETs
- Machine Learning/Deep Learning in Computer Vision
- Machine Learning/Deep Learning in NLP
- Machine Learning/Deep Learning in other Applications
