## **ROBO TRACE**

### **Object:**

The objective of this competition is to complete the course in the shortest period of time, while staying balanced.

### **Robot:**

A balancing robot is a robot that is statically unstable: the robot will remain upright under its own power, but it will fall over if power is removed

The robot must weigh less than 50 pounds. It must not use a combustion engine. The robot must fit inside a 3'x3'x3' cube for the entire duration of its run.

The robot may be either remote controlled or autonomous.

### **Course:**

Robots start behind a white starting line. Finish lines are approximately 6 meters from the starting line. There are two white finish lines, placed approximately 60cm apart. The timer starts when the robot crosses the starting line. The timer stops when the robot remains stationary with its wheels between the two finish lines.

Obstacles may be placed on the course, at the discretion of the robot owner. Each obstacle successfully traversed will apply a scoring multiplier to the robot's time. See "Scoring" for more details.

Course boundaries will be determined prior to race. Robots that stray outside of the course boundaries will have 2X the time outside the boundary added to their score.

Each robot will have a maximum of 3 minutes to complete the course.

### **Scoring:**

Robots will receive a score equivalent to the number of seconds from start to finish.

If a robot falls over, a penalty of 10 seconds will be assessed. The robot may be set upright and continue from the point where it fell over.

Obstacles are assigned a scoring multiplier between 0.1 and 0.9 and will reflect the difficulty of traversing the obstacle.

Approved obstacles include:

- Ramps (up and down)

- Road Cones (drive around or slalom)
- Uneven surfaces (carpet scraps, Astroturf)
- Speed bumps (dowel pieces placed on the ground)

If the robot falls over as a result of encountering an obstacle, the scoring multiplier will not be applied.

Each robot is given 3 attempts to complete the course. The best score out of the three attempts will be used as the final score.
