International Conference

Every year Institute organizes an International Conference with an aims to provide a unified platform where academics and industry researchers present their latest algorithms, models and technologies and explore new trends and ideas on smart computing and informatics. The conference is a great place for researchers to network, collaborate and meet world-renowned experts through discussion in order to learn, exchange and solve problems.In addition to this, the gathering will help the delegates to establish research environment as well as to find the international linkage for future collaboration in their career path. The theme of the conference is "Emerging Smart Computing and Informatics" on a broader front focuses on various innovation paradigms in system knowledge, intelligence and sustainability that may be applied to provide realistic solution to varied problems in society, environment and industries. The conference focuses on various modernization and innovation paradigms that may be applied to present practical and creative solutions to diverse issues in society, industry and environment.The scope of the conference is also extended towards deployment of emerging computational techniques and knowledge transfer approaches, optimizing solutions in varied disciplines of science, technology and healthcare.
