ANNUAL NEWS-LETTER

The News-Letter for Department of Information Technology

Vision:

To equip students with core and state of the art Information Technology.

Mission:

Imparting knowledge of Information Technology and teaching its application through innovative practices and to instill high morale, ethics, lifelong learning skills, concern for the society and environment.

MISSION
VISION
CORE VALUE

Program Education Objectives (PEO):

1. To prepare graduates to solve multifaceted and complex problems in IT industries.
2. To inculcate core professional skills with latest information technology to prepare graduates for employment and higher studies.
3. To develop cross domain competences that prepares graduates for lifelong learning in diverse career paths.
4. To make graduates aware of their social responsibilities toward environment and society.

Program Specific Outcomes:

1. Graduates will be able to demonstrate database, networking and programming technologies.
2. Graduates will be able to apply core, professional and state of the art Information Technology.

Program Outcomes:

Graduates will be able to:

1. Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems. **[Engineering knowledge]**
2. Identify, formulate, research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences. **[Problem analysis]**
3. Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations. **[Design/development of solutions]**
4. Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions.**[Conduct investigations of complex problems]**

- 
5. Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations. **[Modern tool usage]**
 6. Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice. **[The engineer and society]**
 7. Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development. **[Environment and sustainability]**
 8. Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice. **[Ethics]**
 9. Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings. **[Individual and team work]**
 10. Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions. **[Communication]**
 11. Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments. **[Project management and finance]**
 12. Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change. **[Life-long learning]**

Expert lecture on “Linux Kernel Programming” by Mrs. Pranali Chaudhari, Dimensionless Technologies Pvt. Ltd on 23/10/2020 organized by Mrs.Anuja Phapale

The screenshot shows a Microsoft Teams meeting interface. The main content area displays a diagram titled "COMMUNICATION MODEL". The diagram illustrates the process of communication through a central human figure. On the left, three yellow boxes represent internal components: "INTERNAL REPRESENTATION" (with an arrow pointing to the figure), "STATE" (with an arrow pointing to the figure), and "PHYSIOLOGY" (with an arrow pointing away from the figure). On the right, an "EXTERNAL EVENT" box points to the figure, which in turn points to a "FILTERS" box containing "Senses", "Memory", and "Metaprograms". From the figure, an arrow points to a green box labeled "BEHAVIOUR (What we do)". At the bottom center of the slide is the logo for AISSMS. The Teams interface includes a search bar at the top, a sidebar with activity and team icons on the left, and a participant list on the right. The participant list shows several users: Meenakshi Thalor, Anuja Phapale, Jaideep Patil, Pragati Mahale, Prashant Wakhare, Pritesh Patil, Resika Saste, and Riyazahmed Jamadar, with some users marked as "On hold". A recording notice at the top of the slide states, "⚠ You're recording. You are recording this meeting. Be sure to let everyone know that they are being recorded. Privacy policy".

Webinar by Mrs. P.P.Mahale on 05/09/2020 on Mental health Awareness

ANNUAL NEWS-LETTER

The News-Letter for Department of Information Technology

Vision:

To equip students with core and state of the art Information Technology.

Mission:

Imparting knowledge of Information Technology and teaching its application through innovative practices and to instill high morale, ethics, lifelong learning skills, concern for the society and environment.

VISION
CORE VALUE

Program Education Objectives (PEO):

1. To prepare graduates to solve multifaceted and complex problems in IT industries.
2. To inculcate core professional skills with latest information technology to prepare graduates for employment and higher studies.
3. To develop cross domain competences that prepares graduates for lifelong learning in diverse career paths.
4. To make graduates aware of their social responsibilities toward environment and society.

Program Specific Outcomes:

1. Graduates will be able to demonstrate database, networking and programming technologies.
2. Graduates will be able to apply core, professional and state of the art Information Technology.

Program Outcomes:

Graduates will be able to:

1. Apply the knowledge of mathematics, science, engineering fundamentals, and an engineering specialization to the solution of complex engineering problems. **[Engineering knowledge]**
2. Identify, formulate, research literature, and analyse complex engineering problems reaching substantiated conclusions using first principles of mathematics, natural sciences, and engineering sciences. **[Problem analysis]**
3. Design solutions for complex engineering problems and design system components or processes that meet the specified needs with appropriate consideration for the public health and safety, and the cultural, societal, and environmental considerations. **[Design/development of solutions]**
4. Use research-based knowledge and research methods including design of experiments, analysis and interpretation of data, and synthesis of the information to provide valid conclusions. **[Conduct investigations of complex problems]**

- 
5. Create, select, and apply appropriate techniques, resources, and modern engineering and IT tools including prediction and modelling to complex engineering activities with an understanding of the limitations. **[Modern tool usage]**
 6. Apply reasoning informed by the contextual knowledge to assess societal, health, safety, legal and cultural issues and the consequent responsibilities relevant to the professional engineering practice. **[The engineer and society]**
 7. Understand the impact of the professional engineering solutions in societal and environmental contexts, and demonstrate the knowledge of, and need for sustainable development. **[Environment and sustainability]**
 8. Apply ethical principles and commit to professional ethics and responsibilities and norms of the engineering practice. **[Ethics]**
 9. Function effectively as an individual, and as a member or leader in diverse teams, and in multidisciplinary settings. **[Individual and team work]**
 10. Communicate effectively on complex engineering activities with the engineering community and with society at large, such as, being able to comprehend and write effective reports and design documentation, make effective presentations, and give and receive clear instructions. **[Communication]**
 11. Demonstrate knowledge and understanding of the engineering and management principles and apply these to one's own work, as a member and leader in a team, to manage projects and in multidisciplinary environments. **[Project management and finance]**
 12. Recognize the need for, and have the preparation and ability to engage in independent and life-long learning in the broadest context of technological change. **[Life-long learning]**

What is AI and Machine Learning?

- Artificial intelligence refers to the ability of a computer or a computer-enabled robotic system to process information and produce outcomes in a manner similar to the thought process of humans in learning, decision making and solving problems.
- Machine Learning is the science of getting computers to learn and act like humans do, and improve their learning through experience over time by feeding them data and information in the form of observations and real-world interactions
