### Innovation Cell

AISSMS IOIT has formed Institute Innovation council for start up- innovation activities. This council aims to support creating world class innovators and entrepreneurship along with graduation course of engineering. Through IIC our students as well as faculties are attending different online sessions and competitions like, SIH, National Innovation Contests, KAPILA -IPR and leadership program.

### Social Media Cell

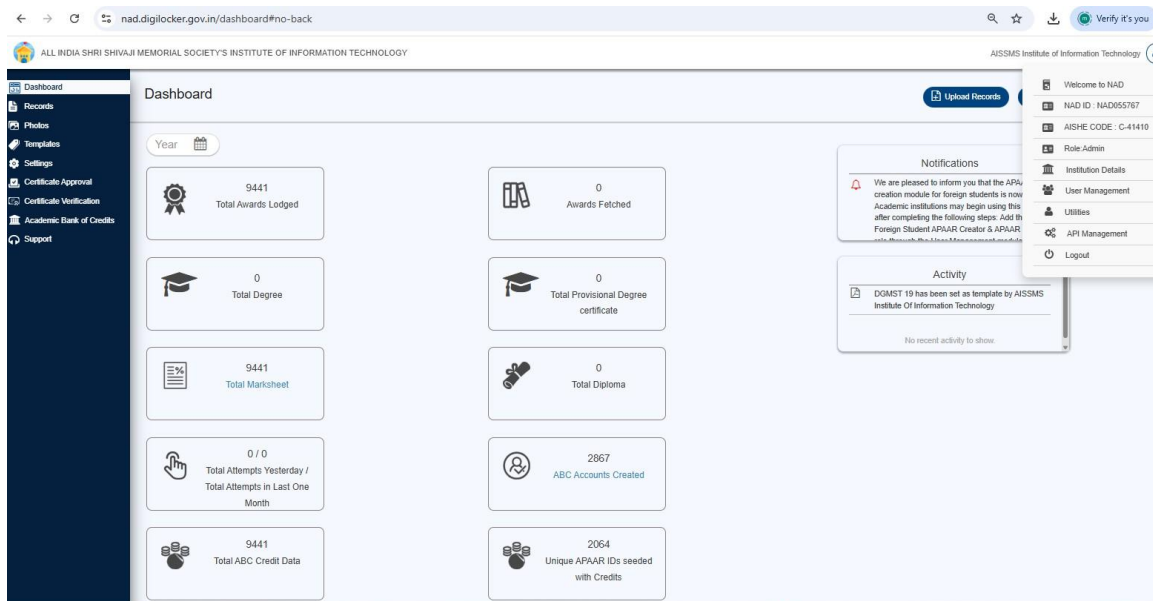

Media is a gift of technology that provides us with the medium for mass communication. Communication tools used to store and deliver information or data. Social media plays an important role in every student’s life. It is easier and convenient to access information, provide information and communicate via social media. Teachers and students are connected to each other and can make good use of these platforms. Platforms like Facebook, LinkedIn, Instagram, YouTube and Twitter are used by almost everyone. Print Media includes newspapers, weeklies, magazines, blogs, banners, graphics, posters and other forms of printed material. In order to effectively make of use of media, it has been decided to publicize our College events through social and print media

### **Internal Continuous Evaluation System**

#### **The Institute adheres to the academic calendar including for the conduct of Continuous Internal Evaluation (CIE)**

The institute follows the examination pattern of the affiliating University. Institute first prepares annual academic calendar before the commencement of the term and then it is circulated to all the departments. Department Coordinator of Academic Calendar takes the responsibility to complete the department calendar in association with all the faculty member members.

Apart from mandatory University examination, many other Continuous Internal Evaluations are being followed by the institute. Internal evaluation is carried out with respect to following points.

- Unit test is arranged after the completion of every unit. Unit test papers are evaluated by
  - respective faculty member members and the student having poor performance are asked to complete the additional task assigned by the faculty member.
- Similarly, assignments are given after the completion of every unit. Faculty member does the evaluation based on timely submission and correctness of the answers.
- Mock orals are organised for subjects having practical/oral/term work as the examination
  - head. Faculty members evaluate the students based on timely submission, presentation and understanding.
- Mock practical examination is also organised after the completion of all practical, in order to make students ready for practical examination.
- Progress presentations and mock demonstration of the projects are organised twice in each semester for students of 3<sup>rd</sup> year and final year.
- Project exhibition is organized for final demonstration and external assessor are invited to assess the performance of students.

Apart from technical internal examinations, students are also assessed based on their participation in

curricular/co-curricular/extra-curricular activities. Students showcase their talent on various platforms provided by institute like national level technical festival - “ALACRITY” and department level events organized by students’ association.

This complete process of internal performance evaluation is used by faculty members to identify slow and advanced learners in their respective subjects. Counselling is done for slow learners and they are encouraged to improve their performance. Counselling sessions found to be very useful to overcome personal issues, academic and non-academic problems.

### Student’s assessment of Faculty, System in place

The Students’ assessment on faculty performance is obtained twice in each semester i.e. four time in a year. The feedback is analyzed at the level of Heads of the Department and corrective measures are taken whenever appropriate.

### (17) List of Research Projects/ Consultancy Works

The institute is having PhD research center affiliated to S P Pune University in Electronics and telecommunication branch, with 59 researchers doing their PhD research work. The institute is having 36 faculties with doctoral degree, and 49 faculties are pursuing their PhDs in various research areas. The institute is having 19 funded research projects with total research grant amount of Rs 39,62,900.00. The institute has power quality cell, through which consultancy work is undertaken by the faculties. The institute has received around Rs 34,00,000.00 in the form of consultancy fees.
